6,393; those of the preceding year, 6,121. The large number of arrests is supposed by the Chief of Police to be accounted for in part by the tondness of the colored people among themselves, but this cause can have affected but slightly the result, inasmuch as the colored arrests number but 41 more than the whites in this large aggregate of nearly 6,500. Indeed, it must be said to the credit of the colored people that while the white arrests for 1872 exhibit an increase of 441 over the arrests for 1873 the colored arrests for 1873 exhibit a decrease of 169 from those

One reason of this decline is the fact that I believe I have succeeded in breaking up a most vicious and unlawful practice, for many years prevalent, of arresting whole companies of colored people on general war-

During the year but one instance of this sort was reported to me, and as I required the money taken from the negroes on this occasion, under color of law, to be refunded to them, the experiment was, so far as I know, not repeated.

I regarded this matter as a flagrant outrage, and should feel it to be my duty to bring it to the notice of the grand jury if less stringent remedies should fail in reform-

THE STREETS.

The public work done in this department during the past year is represented in lineal feet as fellows: Grading, 13,334; gravelling, 106.77; granite gutters, 5,123; brick sidewalks, 7,114; granite curbing, 4,380; flagging, 534; street-paving, 555; macadamizing, 6,981; sewers, 8,804. This, with the other public work under the control of the Committee on Streets, was performed at a cost of \$113,185-a sum less, for the first time since my connection with the city government, than the expenditures of the preceding year. I would be glad to be able to attribute this to a reform in the system of conducting street improvements, but I fear it is attributable chiefly, if not exclusively, to the financial troubles of last October, which caused the curtailment or suspension of certain work in this department.

I renew my recommendation that some equitable plan be entorced to put a stop to the use of public money exclusively for private improvement. If the justice of the reform and the general adoption of it by all cities in the Union of, respectable size cannot reconcile our property-holders to a plan whereby a part of the street improvement, by which their passessions are so largely enhanced, should be borne by themselves, may we not hope that some attention may be paid to the fact that of the total expenditures of the city for all its multiform purposes, save interest, the streets consumed about one sixth. How much the general treasury is by our present system taxed to benefit private individuals could not be better shown toan by a comparison of the following tables, taken, the one from the City Engineer's report, and the other from the Auditor's:

EXPENDITURES ON STREETS BY ORDER OF THE In Marshail Ward. \$ 5.092 65
In Jefferson Ward 2,963 35
In Madison Ward 127 81
In Monroe Ward 7,478 24
In Clay Ward 18,409 97
In Jackson Ward 957 48

ENCREASE IN VALUATION OF REAL ESTATE BY APPRAISEMENT OF 1873. In Marshall Ward..... \$ 347.131

What proof of the fact that our street improvement system taxes the whole for the benefit of the few could be adduced half so conclusive as the remarkable proportion exhibited by those two tables, made by different officers, and with no reference to the point I make? The Engineer calls attention to the need of some settled plan of public improvements, and in referring to it I beg to supplement the suggestion that some settled plan of grading be adopted, and adhered to. Within the past two years the grades of

certain streets have been changed three times, to the great inconvenience, and sometimes loss, of property-holders. Some system should also be devised to secure concert of action between the committees on streets, light, and water with respect to the opening of the road-way for grading, and for the introduction of gas and water-pipes.

of these departments were required to notify each other whenever an improvement involving any large disturbance of the sur-face of a street was contemplated, and sufficient time given for the others to prepare for might be needed in their special lines, much of the useless cost and trouble now existing might be escaped. MEALTH.

The information contained in reports of the Board of Health and the Committee on Health will be found unusually complete and valuable. As a matter of interest, I condense and compare the birth, death, and mar-

riage statistics of the two years: 1872. White Col'd Tot'l White Col'd Tot'l Births.... 982 994 1,776 955 834 1,789 Marriages, 325 242 567 338 252 590 Deaths... 814 900 1,714 977 1,060 2,037

The absolute increase in births is but 13 the increase in marriages, 23; in deaths, 323. As I have no reason to suppose that there from 1872 to 1873—as indeed the statistics of births and marriages tend to show-this increase in the death rate is well worthy of at- 106 in that of 1872-'73. tention, especially as we have been entirely amination of the tables some curious facts present themselves in this connection, the | 83 per teacher in 1872-73. most startling being the appalling mortality among children of five years and under. This amounts to 889, or more than fortythree and a half per cent. of the entire deaths

in the city. As none of these attend the public schools system do not apply. That this mortality among children is not only large, but growformer to have been 25 in 1872, but 66 in was \$84,126.86, of which \$18,760.47 were for 1878; while the deaths from cholera-infantum construction, &c. rose from 91 in 1872 to 138 in 1873.

A further examination of the tables disclose the fact that disease of miasmatic \$84,500. It will therefore be observed that origin, in which are included not alone those | the board has kept within its bonds. Some which are so in the popular acceptation of important additions have been made to the the phrase, but those so classified in scientific categories of disease, produced 446 deaths in 1872 and 579 deaths in 1878. In other words, assuming, as other statistics entitle us to do, that the population of Richtitle us to do, that the population of RichSchool Board, because it is the only corpo-I believe this estimate large, the deaths from ration or agency which has the expenditure This form of disease were as one to one hun- of public money in such large sums without of it—TEN CENTS. dred and thirty-three of population in 1872, being directly and exclusively responsible to

The large and growing mortality from Council members on the school board, the fevers of malarious origin is likewise no- chairman of your Finance Committee shall your Baptist Clergymen of Virginia, phototiceable. In 1872 the deaths from these always be one.

Francisco, the lowest, 1.72.

But it must be observed that our average rate is largely augmented by the greater proprotected by sickness, this amount of lost maffected by sickness, this amount of lost marriy \$3,000, for which she received no marriy \$3,000, for which she rece pearly \$3,000, for which and the city, and lower than New 10rk or Boston, and lower than New 10rk or Boston, and four south in our own country. Nevertheless, when we consider the elevation, the fine surfacedrainage, the excellent water, the mildness of temperature, the absence of specially deleterious trades, and the freedom from epithe most duties the Council will find the eterious trades, and the freedom trond epiper other respect the Council will find the demics which Richmond enjoys, the mortality of our city exceeds considerably a fair

Abut two years ago, in view of these facts, I addressed a communication to the Richmond Academy of Medicine, respect fully requesting its members and the profession generally to procure statistics in order for this means of redressing their wrongs to compile two tables: First, a record of disease, whether terminating in death or not; and, secondly, a record of deaths-but made with reference not to the municipal or political divisions of the city, but with reference to the local prevalence of peculiar types of disease. The communication was favorably considered by that body, and some steps were taken, as I was informed, to carry the bandoned.

I renew the suggestion here in the hope that the Board of Health may undertake at least the latter part of the proposed work The medical certificates of death need only state the residence of the deceased to enable such a report as I have indicated to be made and the localities of greatest mortality, and of peculiar types of mortality, might be then indicated. The practical good of this would be that the Council and the citizens would thereby be furnished both with a guide and stimulus to measures of sanitary reform, now neglected for want of the information necessary to their comprehension.

Suppose, for example, it should be found that miasmatic fevers prevailed within a distance of a hundred yards of Shockoe creek throughout its course, and within like range of the James River and Kanawha canal how soon would the city improve the former and prohibit the exposure of the beds of the latter to summer suns? Here, as elsewhere and everywhere, the first step in remedy is the ascertainment of the place and nature of

IMPROVEMENT OF JAMES RIVER. So much of the welfare of Richmond depends upon a revival of her commercial pros perity that I cannot entertain the fears which seem to be felt by the engineer of this ime provement that the city will grudge the small outlay which is called for as her share of its cost. Unhappily we do not enjoy that influence with those who distribute the public funds of the Federal Government which entitles us to expect much at their hands as a matter of favor. The appropriation asked for by the engineer is only \$5.000, the amount on hand to the credit of the fund, \$8,000, being sufficient, with this addition, in the judgment of this office and of the joint committee, to discharge during the year their part of the joint undertaking entered into with the Government for the prosecution of this work.

The existing arrangement with the United States has been in operation one year, and its results are found partly in the economy of expenditure on behalf of the city, indicated by the above estimate, and partly in the actual work done. One hundred and twenty two thousand six hundred and eighty-six yards have been dredged and placed behind dykes; 2,540 lineal feet of dykes have been constructed; 738 cubic yards of rock blasted and removed from Rocketts reef; 105 boulders requiring the services of divers have been raised and removed.

is now seventy-five feet wide and fifteen impressive manner, begging them to give feet deep at low tide, or eighteen feet at their hearts to the Saviour while they were mean high water; and during the current young that they might have a whole lifetime year these obstructions, the most formidable to devote to His cause, and not wait until in the river, will be completely reduced. It old age rendered them unfit for service for covers a space of 460 feet in length of almost | Christ. continuous rock. From the brewery to the He related several touching incidents in ilbrick-yard, at the commencement of opera-tions, not more than ten and a half feet to the eyes of many in the large congregacould be had at ordinary high tide. Through tion present, all of whom seemed to be deeply this shoal a channel has been made 100 feet interested.

When these improvements are completed the deepening of the channel below will not be difficult of erection; though as the depth of a river is only the depth of its shoalest channel, nothing practical seems to be achieved until all is accomplished. The engineers are agreed that a depth at mean high tide of eighteen feet is not only attainable. but within the certain reach of the existing appliances and arrangements for its attain-

THE PUBLIC SCHOOLS.

The school-year closing with the last of June-a period of seven months in It sometimes happens that the road-beds of populous and much-travelled streets are persed up two or three times in the course of a single year, at intervals, to the city's of interest which would attach to them if great and useless expense, and to the serious they could be made up to a day more nearly obstruction of public transit. If the heads coincident with that of the other branches of public administration. But the general and commendable interest which the public and the Council have always taken in the matter of public education, since the period system was established by law, justifies the such imprevements at the same locality as belief that a short summary of the results will prove acceptable.

The average daily attendance during the last session was-white, 2,151; colored, 1,346; the attendance for the preceding session having been—white, 1,981; colored, 1,273, showing an increase of—white, 171; colored, 73. When we remember that the private reports have remained about as during the preceding year, and that a large and well-attended parish school, in which the poor are educated free, has been put in operation by the Roman Catholic Bishop, these results are very satisfactory. The larger relative as well as positive increase in the white attendance is peculiarly note-

worthy. The number of schools during the past session was: White, 60; colored, 35, against was any considerable increase of population white, 52; colored, 32, in the preceding session. The teachers have also been increased from 89 in the session of 1871-'72 to

The number of scholars in average attendfree from any epidemic disease. On an examination of the tables some curious facts teacher in 1871-72 and to 363 per school and

I indulge the hope that these latter figures will be maintained; at least, that they will

not be materially diminished. The total expenditure on account of the public schools, excluding disbursements on account of construction and on account of the reflections of the Board of Health on the apparatus and furniture, was in 1871-'2, subject of the sanitary effects of our school \$53,402 59, or sixteen dollars and forty-one cents (\$16.41) to each scholar in average attendance. The expenditure on like accounts ing, a glance at the table of causes of death during the past year was \$65,366.39, or eigh-will demonstrate. Take, for example, the teen dollars and seventy-five cents (\$18.75) two most fruitful sources of infantile death to each scholar in average attendance. The in our climate—diphtheria and cholera-in- total expenditure for the public schools on fantum-and we find the deaths from the all accounts during the session of 1872-'3

> The estimated expenditure on all accounts, as published with my message for 1873, was

and rose to one in one hundred and six, or the Council, and in this connection I suggest nearly one per cent, of the whole population that the ordinance concerning public schools DURABILITY of the ENAMELLED and SATIN-FIN- without regard to cost .- CUSTOM WORK MADE e so amended as to prescribe that of the ISHED PICTURES:

causes were 90; in 1873 they amounted to The accommodations for the colored chil101. From these circumstances the death dren at Navy Hill fall much below what rate in Richmond, which is 33 in 1,000 population, is somewhat in excess of the average of American cities. In 1872 Memphis, for white children in the eastern and west-far existing age of American cities. In 1872 Memphis, for white children in the eastern and west-far existing and Hotoken bad as equal or larger death rate, Memphis had as equal or larger death rate, Memphis and larger when such unusual and pressing bad as equal or larger death rate, Memphis and larger when such unusual and pressing larger facilities of the city. At present, had as equal or larger death rate, Memphis and larger when such unusual and pressing larger facilities of the city. At present, had as equal or larger death rate, Memphis baying 46.6. The other cities had less- claims for outlay are upon us, I am of opin- teenth and Cary streets.

New York, the highest, being 3.27, and San | ion that we should put up with some inconburdens on these accounts.

In concluding, gentlemen of the Council I desire to bear witness to the intelligence and fidelity with which you have discharged your troublesome, unpaid, and often urpleasant public duties, and to express, as I bave many public and private occasions to do, my sincerest thanks for the consideration and courtesy you have, without exception, been pleased to extend to myself.

Very respectfully, your fellow-citizen, A. M. Kelley, Mayor.

CHURCH NOTES. The services in all of the city churches or unday were of the usual interest, and were

well attended. At the First Baptist church very large con gregations were present on Sunday, and much interest was evident in the services, Some forty inquirers presented themselves at night. Rev. A. P. Graves, of New York preached, and will continue to hold meetings

every night this week. At the Grace-Street church a series o meetings are in progress, large congregations attending, and it is proposed to continue these meetings every night this week At the Fulton church two persons were proposal into effect; but they were at last received by letter and two others received the hand of fellowship.

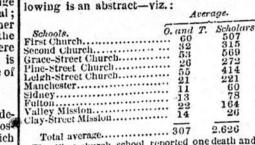

The congregations at all the churches were ery large, especially on Sunday morning. To-night Rev. A. P. Graves will preach sermon to young women at the First Baptist church.

BAPTIST SUNDAY-SCHOOL ASSOCIATION. The regular monthly meeting of the Baptist Sunday-School Association was held or Sunday afternoon at the Second Baptist church. The President, J. B. Winston, Esq. presided; Mr. Otway D. Browne secretary.

prayer by Rev. J. R. Garlick, of the Leighstreet church. The monthly reports of the superintend ents were next presented, of which the fol-

The devotional exercises consisted of sing

ing by the Second church Sunday school and

The First church school reported one death an one conversion.

The Grace-street school reported one death.
The Valley Mission school reported one death
and two conversions.

At the request of the superintendent of the Valley Mission school, Professor Hurrison led the Association in prayer in behalf of a teacher of that school who was not a Christian.

By invitation of the president, Rev. A. P. Graves, who is now laboring as an evangelist at the First Baptist church, repeated a sermon to the children that he preached on Saturday last at that church. He took for his text, "And Eli perceived that the Lord had called the child." He stated that he learned from the text that Eli bad lived to be ninetyeight years old before he was convinced that God called children to be Christians; but trusted that none of his present audience would arrive at that age before believing that

children were salled to love Jesus. The first portion of his address was to parents and Sunday-School teachers, urging upon them the importance of laboring and praying for the conversion of even very small children, citing many instances of persons who had been greatly distinguished for their piety and usefulness, and who had been The channel at Rocketts reef, to which the converted at a very early age. He next adiressed the children in a very earnest and Main street, Richmond,

lustration of his subject which brought tears

wide and sixteen feet deep. The removal of At the close of his address Rev. Dr. Curry certain ledges of rock in this shoal will led the Association in a special prayer for the give the standard eighteen feet here also, and children. Rev. Dr. Tupper then pronounced this will probably be effected during the a benediction, and the Association adjourned to meet at the Pine Street church on the afternoon of the second Sunday in April.

> METHODIST SUNDAY SCHOOL SOCIETY. The regular monthly meeting of this Society was held at Manchester Methodist church Sunday afternoon at 31 c'clock-T L. D. Waltord, president, in the chair; John L. Sims, assistant secretary.
>
> The meeting was opened with singing by Manchester school, and prayer by Rev. W.

> B. McGilvray. Rev. W. G. Lumpkin, pastor of Manchester Methodist church, gave a very interesting report of the condition of the school. This school now has a full corps of earnest and faithful officers and teachers, and an increased roll of scholars. For some time past there has been an encouraging religious

feeling in the school. Rev. A. C. Bledsoe, of Trinity church, then addressed the meeting-subject, Evangelization of the World Must Begin with the Children. He urged the great importance of bringing children into the Sabbath school, where they may be taught the truth as it is in Jesus. Also, the necessity of a pious example and godly conversation on the part of parents and guardians, in order that the children may have ever present living evi-dences of the truth of Christianity. He closed with an earnest appeal to the children to strive to build up good, Christian charac-ters by using all the means of grace, especially prayer.

Mr. A. L. West, assistant president of the Society, then made a very interesting addresssubject, "The Brazen Serpent." The following is a summary of superin-

tendents' reports for February: Nicholson-Street..... The next meeting will be held at Trinity

church on the second Sunday in April.

VOCAL AND INSTRUMENTAL CONCERT .- This evening a grand vocal and instrumental coucert will be given by Mr. Leo. P. Wheat at the Grace-Street Presbyterian church for the benefit of the church. Mr. Wheat will be assisted by his quartette choir and the wellknown "Mendelssohn Sextette." The programme embraces some choice selections from Rossini, Kreutzer, Wagner, Suppe, and Flotow, besides several of Mr. Wheat's own composition. There will doubtless be a very

large attendance. THE GERMAN CONSERVATIVE CLUBS OF MAN shall and Jefferson Wards meet at their clubroom, No. 1703 Main street, to-night.

REPORT OF THE LIBRARY DRAWING .- The pub lishers of the Louisville Courier-Journal announce that they will have a corps of reporters at the tucky, which comes off in their city on the 31st of March. They propose to publish in their issue of April 1, not only a full list of the drawn numbers, but a racy, graphic, and correct account of the incidents of the day. There is now no doubt that the drawing will take place at the time appointed, and the indications are that it will be a full one, and that the enormous sum of \$1.500.000 will be distributed among the ticket-holders. The publishers will send copies of their paper by the first mails after the drawing to all who will send them the price

PIMPLES, ERUPTIONS, ROUGH SKIN .- The sys tem being put under the influence of Dr. PIERCE'S Golden Medical Discovery for a few weeks, the kin becomes smooth, clear, soft, and velvety, and being illuminated with the glow of perfect health from within, true beauty stands forth in all its glory. Nothing ever presented to the public as a beautifyer of the complexion, ever gave such satsfaction for this purpose as this Discovery. The effects of all medicines which operate upon the system through the medium of the blood are necessar rily somewhat slow, no matter how good the remedy employed. While one to three hottles clear the skin of pimples, blotches, eruptions, yellow spo comedones, or "grubs," a dozen may possibly be required to cure some cases where the system is rotten with scrofulous or virulent blood-poisons. The cure of all these diseases, however, from the common pimple to the worst scrofula is, with the use of this most potent agent, only a matter of time. Solo by all druggists.

COVERED WITH ERUPTIONS-CURED. CLAVERACK, COLUMBIA COUNTY, N. Y. Dr. R. V. Pierce, Buffalo, N. Y.:

Dear sir .- I am sixty years of age, and have been afflicted with Sait Rheum in the worst form for a great many years, until, accidentally, I saw one of our books, which described my case exactly. I bought your Golden Medical Discovery and tool two bottles and a half, and was entirely cured From my shoulders to my hands I was entirely covered with cruptions, also on face and body. I was kewise afflicted with rheumatism, so that I walked vith great difficulty, and that is entirely cured May God spare you a long life to remain a blessing to mankind. With untold gratitude, MRS. A. W. WILLIAMS.
